

# Über und unter die Zehn

Nach dem Ausschneiden und Falten können die Kärtchen noch laminiert werden.

Es kann auch nur addiert oder subtrahiert werden.

Für kurze „Zwischenübungen“ lasse ich manchmal einfach eine oder mehrere Karten aus der Kiste ziehen. So entscheidet der Zufall, welche „schweren Aufgaben“ gerechnet werden. Als Hausübung eignen sich die Karten für das „Karteikartenprinzip“.

$$6 + 7 = 13$$

$$6 + 4 + 3 = 13$$

$$13 - 7 = 6$$

$$13 - 3 - 4 = 6$$

Nach hinten falten

$$7 + 6 = \square$$

$$\square + \square + \square = \square$$

$$13 - 6 = \square$$

$$\square - \square - \square = \square$$

$$5 + 7 = \square$$

$$\square + \square + \square = \square$$

$$12 - 7 = \square$$

$$\square - \square - \square = \square$$

$$7 + 5 = \square$$

$$\square + \square + \square = \square$$

$$12 - 5 = \square$$

$$\square - \square - \square = \square$$

$$4 + 7 = \square$$

$$\square + \square + \square = \square$$

$$11 - 7 = \square$$

$$\square - \square - \square = \square$$

$$7 + 4 = \square$$

$$\square + \square + \square = \square$$

$$11 - 4 = \square$$

$$\square - \square - \square = \square$$

$$7 + 7 = \square$$

$$\square + \square + \square = \square$$

$$14 - 7 = \square$$

$$\square - \square - \square = \square$$

$$8 + 7 = \square$$

$$\square + \square + \square = \square$$

$$15 - 7 = \square$$

$$\square - \square - \square = \square$$

$$7 + 8 = \square$$

$$\square + \square + \square = \square$$

$$15 - 8 = \square$$

$$\square - \square - \square = \square$$

$$9 + 7 = \square$$

$$\square + \square + \square = \square$$

$$16 - 7 = \square$$

$$\square - \square - \square = \square$$

$$7 + 9 = \square$$

$$\square + \square + \square = \square$$

$$16 - 9 = \square$$

$$\square - \square - \square = \square$$

$$7 + 10 = \square$$

$$\square + \square + \square = \square$$

$$17 - 10 = \square$$

$$\square - \square - \square = \square$$

$$8 + 3 = \square$$

$$\square + \square + \square = \square$$

$$11 - 3 = \square$$

$$\square - \square - \square = \square$$

$$3 + 8 = \square$$

$$\square + \square + \square = \square$$

$$11 - 8 = \square$$

$$\square - \square - \square = \square$$

$$8 + 4 = \square$$

$$\square + \square + \square = \square$$

$$12 - 4 = \square$$

$$\square - \square - \square = \square$$

$$4 + 8 = \square$$

$$\square + \square + \square = \square$$

$$12 - 8 = \square$$

$$\square - \square - \square = \square$$

$$5 + 8 = \square$$

$$\square + \square + \square = \square$$

$$13 - 8 = \square$$

$$\square - \square - \square = \square$$

$$8 + 5 = \square$$

$$\square + \square + \square = \square$$

$$13 - 5 = \square$$

$$\square - \square - \square = \square$$

$$6 + 8 = \square$$

$$\square + \square + \square = \square$$

$$14 - 8 = \square$$

$$\square - \square - \square = \square$$

$$8 + 6 = \square$$

$$\square + \square + \square = \square$$

$$14 - 6 = \square$$

$$\square - \square - \square = \square$$

$$8 + 8 = \square$$

$$\square + \square + \square = \square$$

$$16 - 8 = \square$$

$$\square - \square - \square = \square$$

$$8 + 9 = \square$$

$$\square + \square + \square = \square$$

$$17 - 9 = \square$$

$$\square - \square - \square = \square$$

$$9 + 8 = \square$$

$$\square + \square + \square = \square$$

$$17 - 8 = \square$$

$$\square - \square - \square = \square$$

$$9 + 10 = \square$$

$$\square + \square + \square = \square$$

$$19 - 10 = \square$$

$$\square - \square - \square = \square$$

$$9 + 2 = \square$$

$$\square + \square + \square = \square$$

$$11 - 2 = \square$$

$$\square - \square - \square = \square$$

$$2 + 9 = \square$$

$$\square + \square + \square = \square$$

$$11 - 9 = \square$$

$$\square - \square - \square = \square$$

$$9 + 3 = \square$$

$$\square + \square + \square = \square$$

$$12 - 3 = \square$$
