

# Gerade und Ungerade

**Ungerade**

**Gerade**

1 2 3 4 5

6 7 8 9 10

11 12 13 14 15

16 17 18 19 20

Schneide die Zahlenkärtchen und die Perlenkärtchen aus.  
Klebe sie auf das Blatt mit den Spalten „Gerade und Ungerade“.  
Teile die geraden Zahlen noch mit einem Bleistiftstrich, dadurch kannst du sehen, ob sie wirklich gerade sind, denn nur die Zahlen, die sich teilen lassen, sind gerade.
