

1. Rechne die Aufgaben aus!

a) $12 = 8 + \square$

$24 = 32 - \square$

$8 = \square + 2 + 1$

$\square - 11 = 14$

$17 - \square = 13$

$\square - 18 = 2$

$16 = \square - 3$

$7 = 7 - \square$

b) $124 - \square = 102$

$347 + \square = 350$

$45 = \square - 5$

$237 = \square - 20$

$708 - \square = 690$

$63 - \square = 50$

Erkläre, wie du rechnest !

2. Fixe Zehn
